- Git

EXPERIENCE

Full Stack Developer

SBB AG / Bern / Mar 2022 – Present

At SBB, I developed and maintained frontend applications using Angular, implemented the backend infrastructure with Spring Boot and Postgres, utilized Apache Kafka for real-time data processing, assisted with DevOps tasks, worked in an Agile team environment, and contributed to the delivery of high-quality software.

- Developed and maintained frontend applications using Angular, ensuring a seamless user experience for customers.
- Implemented and managed the backend infrastructure using Spring Boot, ensuring fast and reliable performance.
- Designed and developed databases using Postgres, ensuring efficient data storage and retrieval.
- Utilized Apache Kafka for real-time data processing, improving the overall performance and scalability of the application.
- Contributed to the Agile software development process, participating in daily stand-ups, sprint planning, and retrospectives.
- Assisted with DevOps tasks, including server administration, continuous integration and deployment, and monitoring.
- Implemented version control using Git and managed the pipeline effectively using Jenkins.
- Wrote clean, maintainable, and testable code, ensuring the long-term stability and maintainability of the application.

Self-Employed

IT Support Basel / Basel / Sep 2018 – Mar 2022

As a self-employed software developer, I successfully built a customer base, designed and developed custom apps and web-apps, and provided ongoing support to clients while continuously improving my skills and growing the business.

- Started my own company, successfully building a customer base and providing hardware and software support.
- Designed and developed individual solutions for clients in the form of apps and web-apps, meeting their unique needs and requirements.
- Managed servers and applications, ensuring their stability, security, and performance.
- Built and maintained relationships with clients, providing ongoing support and advice to help them achieve their goals.
- Managed all aspects of the business, including finances, marketing, and customer service.
- Delivered high-quality software solutions, consistently exceeding clients' expectations and growing the business.

EXPERIENCE - CONTINUED -

Field Service Technician

Swisscom AG / Basel / Sep 2015 – May 2018

As a Field Service Engineer at Swisscom, I provided on-site technical support, installed and maintained networking equipment, maintained accurate documentation, demonstrated strong problem-solving skills, delivered excellent customer service, and worked independently and as part of a team to deliver high-quality technical solutions.

- Provided on-site technical support to Swisscom customers, troubleshooting hardware and software issues and resolving technical problems in a timely manner.
- Installed, configured, and maintained networking equipment, ensuring that the customer's infrastructure was running smoothly and efficiently.
- Collaborated with other team members, including network engineers, developers, and project managers, to resolve complex technical issues and provide solutions.

Field Service Technician

Alpiq / Basel / Sep 2014– Aug 2015

- Maintained an accurate and up-to-date documentation of customer network configurations and installed equipment, ensuring that the information was easily accessible for future reference.
- Stayed up-to-date with the latest technologies and trends in the field of networking, continuously improving my knowledge and skills.
- Demonstrated strong problem-solving and critical thinking skills, proactively identifying and resolving technical issues before they became bigger problems.

Field Service Technician

IWB / Basel / Aug 2012 – Aug 2014

- Provided technical support to IWB Basel customers, troubleshooting and repairing hardware issues on-site.
- Worked closely with customers to understand their technical requirements and provided solutions that met their needs.
